

SPECTRUM OF OUR SERVICES

- check-up programs
- preventive cardiology
- complete diagnostics and therapies in cardiology
- laboratory tests
- cardiac catheterization
- cardiovascular catheter interventions
- pacemaker and defibrillator therapies
- heart surgery
- pediatric cardiology
- sports & diving medicine
- alternative therapeutic methods
- diagnosis and management of burnout disease
- coaching, psychocardiology

KIZ-TEAM

Prof. Dr. med. Thomas Ischinger (PhD, FACC FESC)

Dr. med. Gregor Ley

Dr. med. Bo Friedrichsen

Dr. med. Fabian Müller-Hartmann

Cardiology, Internal Medicine, Interventional Cardiology,
Sports Medicine, Emergency Medicine

Prof. Dr. med. Klaus Wenke Heart Surgery

Dr. med. Anette Meidert Pediatric Cardiology

ACCESS

By car

From Sonnenstraße in northern direction, right turn onto Herzogspitalstraße. The 2nd street on the left is Eisenmannstraße. Our entrance is only a few meters away (Eisenmannstraße 4). You may park your car in one of the nearby parking garages.

Public transportation

U4/U5 to Karlsplatz (Stachus), U3/U6 to Marienplatz,
U1/U2 to Sendlinger Tor.

All S-Bahn lines and Trams 16/17/18/19/20/21/27 to
Karlsplatz (Stachus).

Kardiologie
im Zentrum 

EXPERT CENTER
FOR CARDIOVASCULAR MEDICINE

Cardiology – Interventional Cardiology – Cardio Check up
Heart Surgery – Pediatric Cardiology – Preventive Medicine

We at **Kardiologie im Zentrum (KIZ)** are a group of specialists in cardiology, minimally invasive catheter procedures, heart surgery and pediatric cardiology. We have decades of scientific and clinical experience with diagnosis and treatment of cardiac and vascular disease. Our expertise includes all subspecialties.

— KIZ PREVENTION

Heart attack and stroke are very traumatic events. Modifiable cardiovascular risk factors such as high blood pressure, metabolic disorders (e.g. high cholesterol, diabetes), smoking or sustained stress situations favour the development of cardiovascular events. We identify your risk and stress profile and recommend adequate strategies for prevention or treatment.

— KIZ DIAGNOSTICS

We have all of the modern diagnostics available for you. In addition to routine diagnostics, we provide electrophysiologic testing, pacemaker and defibrillator control, modern imaging with cardiac CT and cardiac MRI, and heart catheterization procedures. A special program is available for burnout patients.

— KIZ CARDIO CHECK

Our professional examination program provides all relevant tests to assess your cardiac and vascular health. If necessary we will initiate the suitable and effective treatment strategies. The check-up includes:

- individual consultation, medical history
- physical examination, blood pressure, ECG
- cardiac ultrasound (echocardiography)
- ultrasound of the aorta and the carotid arteries
- stress echocardiography (with ECG, blood pressure)
- complete spectrum of blood tests
- in-depth discussion of results

A specific program (HRV) is available to detect burnout disease. It permits visualization of your stress profile and individualized management.

— KIZ THERAPIES

Our expertise extends to the full range of medical and invasive therapies for coronary heart disease, valvular disease, septal defects, heart failure, myocardial infarction, arterial hypertension, thrombo-embolic disease, rhythmologic disorders (e.g. atrial fibrillation), peripheral and carotid artery disease, pacemaker and defibrillator therapies.

— KIZ INTERVENTIONS

Minimally invasive interventions for cardiovascular diseases: coronary, peripheral artery and carotid stenting, closure of ASD and PFO, valve implantation, ablation of rhythm disorders, LAA closure in atrial fibrillation, renal ablation in hypertension. Our experience in interventional cardiology is one of the largest in the world.

— KIZ HEART SURGERY

If surgery is the better option: Our experienced heart surgeon is available for providing the surgical therapy or for consultation only prior to any treatment selection.

— KIZ FOR KIDS

Our dedicated pediatric cardiologist cares for the smallest hearts. Services include noninvasive diagnostics and therapy and follow up for congenital heart disease.

— KIZ SECOND OPINION

We assist with decision making of difficult treatment options by providing you with comprehensive information and objective assessment. Our experience helps you and your family to make the right choices.
